At New York yesterday money on call was easy at 2@21/2 per cent., the last loan being at 2 per cent,, closing offered at 2

Prime mercantile paper, 7@9 per cent. Sterling exchange was firm, with actual business in bankers' bills at \$4.84%@4.85 for demand, and at \$4.82%@4.83 for sixty-day bills. Posted rates, \$4.84@4.86; commercial bills, \$4.81\@4.82.

Silver certificates, 74@75c. Bar silver, closed at 73%c per ounce; at London, 33%d. Total sales of shares amounted to 128,000, of which, however, one-quarter were in Reading and more than another quarter in Whisky, Atchison and Sugar. The trading outside of these shares was very light. The greater part of the day's business was done before noon, and after that hour dullness settled on the exchange, which was almost funeral in its character. A strong buying movement was inaugurated in Reading at the opening, and large blocks were taken at advancing quotations, the purchasing orders coming mainly from Philadelphia. In the late dealings part of the early improvement was lost, and the close was only % per cent, above the final sale of Wednesday. Whisky, which came next in point of activity, was pressed for sale in the early trading, chiefly by houses with Washington connections, which led to an impression that possibly contemplated ac-tion on the tariff was not favorable to the Atchison was sold freely during the morning for the Boston account, and there was also some sales on London orders, due to a report that holders of guarantee fund notes maturing Nov. 1 would be asked for a five-year extension in the payment of a five-per-cent commission. Sugar was pretty strong in the forenoon, advancing 1 per cent., but losing all but 1/8c of the improvement in the late trading. There was a better feeling than on Wednesday in Union Pacific, possibly due to the reconsideration by the company of its notice of withdrawal from the Western Passenger Association. American Tobacco, both com-mon and preferred, rose 2 per cent on the

LOCAL GRAIN AND PRODUCE. Trade More Active Under Favorable

Weather with Few Changes. On the wholesale streets, yesterday, trade was fairly active and better than last week. The pleasant weather doubtless helped matters. In most lines prices carry a firm, steady tone. Especially is this true of staple groceries, provisions and produce. Poultry is in good demand. Receipts of eggs are light and prices strong. Irish potatoes are arriving more freely and low prices are indicated, although not yet of-fered. Watermelons are about off the market, selling yesterday as low as \$5 per 100 for large melons. Receipts of butter are more liberal and prices easing off. The local grain market showed more life

yesterday. Wheat ruled as on Wednesday, while corn advanced, more than recovering the loss of Wednesday. Oats ruled steady at prices of some days past. Track bids yesterday ruled as follows: Wheat-No. 2 red, 60c; No. 3 red, 57c; No. 2 mixed, 28%c; No. 3 mixed, 27%c; re-

WHEAT FELL TO 671-4C

Chicago Bears Raided the Grain Pits with Marked Success.

Corn Tumbled on the Report that the Crop Will Average Better than Expected-Provisions Less Dull.

CHICAGO, Oct. 5 .- A tumble in all the cereals to-day was started by raiding in corn. It came in the last half hour, up to which time the markets were floating in almost a dead calm. The hurricane of the final few moments blew away 1c of the price of corn and wheat and the longs were still desperately unloading as the session ended. Oats weakened from 1/4 to 1/2c. Provisions were firm and a shade less dull. The drive at corn had behind it John Dupee and N. B. Ream, according to the pit gossip, and there was a short but terrific struggle among the local longs to get rid of holdings. Men in the wheat pit, while bearish regarding their own specialty, appeared to have been long in the corn market. They rushed over and filled up the previously half-deserted corn pit, and tumbled over each other in their anxiety to sell out. The elevator interests bought moderately of October and May. Considerable attention was given the statement of the Price Current that the corn yield is proving as good, if not better, than looked for. The pastures all over the corn belt have improved beyond what was thought possible, and much less corn will be fed. Wheat opened about 1/6/4c lower, but quickly developed strength, and prices were muvanced 1/6/4c, declined 1/6/1c, and the closing was 1/6/4c lower for December and 1/6/4c lower for May than yesterday. The lower opening was due to lower cables, and the advance which followed was atand the advance which followed was attributed to the covering by shorts, stimu-lated some by later clearances and the reduction in the rate of interest at the Bank of England. St. Louis also wired that ex-porters were bidding 1c more than they dld yesterday. A cargo of red wheat was reported worked off at Baltimore. But the advance brought out rather free offerings, which soon developed into general selling. in oats the greater part of the cline did not occur until the last half hour, when the break in corn started a moderate selling movement. The market closed easy

Products were little affected by the break in grain, and last prices were 15@25c up for pork and .10c up for lard and ribs. The market had an advancing tendency on account of the continued moderate run of hogs. There were some buying orders for January stuff, and when the holders of those orders went into the market to fill them Sam Wolff, R. W. Rolson and the Chicago Packing Company helped to put the market where sellers could get a good

There was a good demand for vessel room and offerings of boats ready to load not large. Rates held firm at 24c on wheat and 2c on corn to Buffalo and 13c for corn to Port Huron. Estimated receipts for to-morrow are: Wheat, 167 cars; corn, 137 cars; oats, 126 cars; hogs, 18,000. The lead-ing futures ranged as follows:

TRADE IN GENERAL.

Quotations at St. Louis, Philadelphia, Baltimore and Other Points. MINNEAPOLIS, Oct.5.-In addition to absence of any encouragement to the hold-

ers of wheat, cables weak and lower, and general disinclination to buy to-day, there were large local receipts and annual elec-tion of members of the board. Outside of elevator transactions and free selling against cash purchases, values were gov-erned altogether by the scalping trades, Heavy receipts continued to depress the market, and from all accounts the movement is likely to continue for a little while longer. December wheat opened at 61c, against 61%c yesterday, sold at 60%c, advanced to 61%c, and closed at 60%c. May wheat opened at 68%c, firmed up to 68%c, and closed at 68%c. The cash wheat market ket ruled fairly active, with a good demand from local millers for good grades. Elevator companies were also free buyers, but at a lower rate of value during the early part of the session. Towards roon cash values appreciated a little in sympathy with the futures market. No. 1 hard was sold at 611-062c, No. 1 Northern at 59\\a59\c, and No. 2 at 57\\alpha 58c. Receipts here were 473 cars; shipments, 43 cars. The flour market was dull and declined in sympathy with wheat. Patents were held along from \$3.35 for seconds to \$3.95, and, in some instances, \$4 for firsts. The output is still quite full, although not so large as last week. The market was

steady and fairly firm for both bran and shorts at about 25c decline, with bulk bran going at about \$19,25.

Dry Goods.

NEW YORK, Oct. 5.-Prices have not varied to any essential extent in the drygoods market, but in the main the tendency is in buyers' favor. Cotton goods rule quiet, with a demand for small lots. Prints and printed fabrics rule dull and show weakness. Print cloths are selling in a moderate way only, at former prices, or on the basis of 2%c for extras. Ginghams and woven goods are confined to small orders; a few of the fancies and the higher-priced makes command the most attention. Ho-siery and underwear hold their own, with some weakness and irregularity in low grade lines. Dress goods and woolens are quiet, except for clothing wools; they are fairly active, with some selling pressure leading to irregularity. Foreign dry goods rule quiet, without change in the prices. The jobbing trade is generally slow in all departments.

ROCKEFELLER'S MONEY.

He Will Use a Million of It in Building a New York Herald.

The biggest single transaction in real estate up the Hudson ever recorded is about to be consummated between John D. Rockefeller and about a dozen property owners at Tarrytown. The land embraced amounts in the aggregate to a little less than five hundred acres, and the cost is in the neigh-

borhood of \$750,000.

The buying up of the Westchester tract includes the building of a mansion which will cost over a million of dollars. The site of the mansion will probably be a broad topped eminence about a mile and a half east of Broadway. The architect has not yet been selected, so far as could be learned. In a general way it has been decided to build a structure which in some portions will be three and in other portions four stories high. The materials will be marble, stone and granite. Towers and porticos will ornament various sides.

The deal has been in progress for about six months. Considerable difficulty was experienced in securing all the properties desired. The major portion of the land was embraced in six estates. Lying between some of these were smaller tracts that had been divided up into building lots and sold by Wilson H. Blackwell. It was necessary to purchase these lots from the small owners, and this occasioned numerous delays. These holders were unwilling to sell, because they had in nearly every case intended to put up permanent homes.

Mr. Rockefeller was particularly desirons of securing just the property selected, for the reason that it almost joins Rockwood, the country home of his brother William. The latter has in all 814 acres, for which \$800,000 was paid. The residence just finished by him is of stone, and cost about \$2,000,000. The improvement of the grounds cost over \$100,000. From a reliable source it was learned that

Mr. Rockefeller has long had a big project in mind which should be a public benefit. It was supposed at the time his name was connected with the purchase of St. Luke's Hospital property that his intention was to erect a fine structure, to be devoted to pubto come as a monument to his memory. Whether it shall turn out that Mr. Rockefeller has any interest in the St. Luke's property or not, it is quite certain that at one time he seriously contemplated being the sole purchaser of it.

IT COSTS MONEY.

One Household Where No Fruit Will Be Put Up This Year.

Detroit Free Press. "I want you to figure a little for said a Second-avenue wife to her husband, as she brought him pencil and

He looked at her suspiciously as he made ready, and a close observer would have noted signs of grim determination around his mouth.

"I want," she said, as she looked into the far-away purple of sunset, "about two bushels of peaches." "And one of pears."

"I might possibly get along with half a bushel of plums, but I want at least a bushel of Siberian crabapples." "Anything else?" "Oh, yes. I must have citrons, tomatoes,

cauliflower and cucumbers." "I've got it down, but where does the figuring come in?" "I want you to figure, as near as you can, on the cost of all these, together with ten dozen glass cans, a bushel of currants, fifty tumblers, with sugar, vinegar and spices

enough to preserve all the fruit."

He was a lightning calculator. In thirty seconds he had added up a column of tigures, tacked on 10 per cent. for his commission and muliplied the total by two to cover breakage.

"What!" she gasped as she received the paper and glanced at the figures—"you don't mean \$3,225.40!" "Certainly I do," he replied as he picked up his newspaper again. "But we can't spare that to put up sauce

for the winter." "Just as you think. We can sell our home for \$5,000 and put \$3,255,40 into preserves, or we can keep our home and fill the vacuum with prunes and evaporated apples. Go over the figures for yourself." She took the paper and began to figure on her own account, but after raising the total \$875 she went out into the kitchen and told the girl that as there would be no doing up fruit this year she might have a week's vacation."

Gold Mining in Montana.

Helena Independent. It can be truthfully said of Montana, as it has been of California, that the suriferous ground of the State has been scarcely more than skimmed over. The presence of rich gold deposits in the State is not a matter of speculation-the fact is known to be true. The gold ontput of Montana in 1892 was, in round numbers, \$3,000,000. Though this is a small sum compared with the silver output for the same time, it is an item not to be despised, and with the depression of the silver-mining indus-try there should be a corresponding reviual of gold mining.

AND

WEEKLY

The Journal's price for daily is only 15 cents a week, and it has a very wide circulation, reaching a large number of people hitherto unable to afford the luxury of a first-class daily paper. Reports from agents and subscribers indicate a continued increase, and that what used to be regarded as a luxury has become a necessity. The new readers not only remain, but they are constantly increasing.

It is the purpose of the Journal to make itself even more indispensable to its patrons, new and old, and to still further widen its field. To this endit will not only endeavor to maintain the characteristics which have established its reputation as by far the best newspaper in Indiana, but will add such new features and improvements from time to time as are in accord with journalistic progress and that may tend to the advantage of its readers. It will, for example, give increased attention to State and local interests. What Indianians want is a paper in which Indiana affairs given are especial prominence and importance. This want the Journal has always supplied as no other paper published outside or inside the State is able to do; but the rapidly developing industries and business and social enterprises of the community call for additional consideration and space, With this in view its corps of correspondents has been increased until ithas a representative in nearly every town in the State Special traveling correspondents will visit the news centers of the State at frequent intervals, thus insuring the "write up" of every important event or matter of general interest.

Being published in the geographical center of Indiana the Journal is afforded unusual facilities for securing news promptly, and, what is of greater consequence, is able to reach its subscribers without delay. The ruuning of moraing trains from Indianapolis is very favorable to the early distribution of papers sent by mail or express, and in most towns within a radius of a hundred miles Journals are delivered as early as in the city where they are printed. In the more remote counties there is but little loss of time in transportation.

The Journal is the paper for Indianians and particularly for Indiana Republicans. The change of administration involves the settlement of political problems likely to be of the most direct personal concern to every farmer and business man in the State. All such matters will be set forth in detail, the Journal's Washington correspondent being instructed to give especial attention to every hing having a possible bearing on Indiana interests.

But though the Journal is Republican in politics it is non-partisan in the publication of news. Its constantendeavor is to secure facts unbiased by prejudice and to make its columns trustworthy records of each day's happenings. A large editorial force supplements the work of the press associations and the correspondents, and furnishes careful supervision for each department.

The Sunday Journal has a well-established literary character, superior to that of any Western paper. It is not defaced by "plate matter" nor fille! with a heterogeneous mass of syndicate literature, but its contributions and miscellany are chosen with a view to their special fitness and adaptability to the tastes of the readers. The reading matter in any given number of the Sunday Journal is equal in quantity and is not inferior in quality to that found in the leading magazines. As an educational adjunct and a source of entertainment the Sunday Journal is indispensable in every well-regulated family.

The Weekly Journal, at \$1 per year, contains more reading matter than can be obtained for the money in any other shape. It is carefully edited and offer the news of the week in condensed shape and a variety of miscellany, agricultural and hous hold literature that render it one of the best investments that any family can make. Try it and see. It has a large circulation in this and other States and agents find it an easy matter to secure large lists of subscribers. Special inducements offered to agents.
